Notes:

- 0/ A centre channel derivative of the Mar-Ken12 designed for modified Mark Audio Alpair 12, will work well with stock driver
- 1/ All panels 18mm (23/32")
- 2/ Vents are 8mm high
- 3/ brace shape is only suggestive -- prime purpose is to brace driver, it needs to be about 35-40% holes. (ie if you have to mount a terminal cup in the middle, you'll want to make sure the brace allows clearance), it is intentionally just off centre.
- 4/ Don't forget to angle cut the back of the driver cut-out to give it breathing room
- 5/ All internal panels lined with ~1/2" (12mm) wool felt (preferred), 3/4" (19mm) poly-fluff batting, or 1" (25mm) fiberglass Note that it is hard to get into the box after it is sealed up.
